

Healing Horses the Classical Way

Harry Faibish studied under Egon von Neindorff, Nuno Oliveira, and Hans Reigler and has worked in Europe and the USA at highly prestigious stud farms, training centers, and competition yards. While he has vast experience of working with horses of different breeds and types in all stages of their development, his chief love is helping to rehabilitate horses who have been disadvantaged, mentally or physically, by inadequate or inappropriate handling. In *Healing Horses the Classical Way*, he explains why riding and training rooted in the classical tradition is the only sure way to prevent such problems developing and how, if they are inherited from previous handlers, it can remedy serious and ingrained problems. These ideas are illustrated by a number of detailed case histories from the authors own work. The case histories are supported by a brief autobiography and a section in which the author reiterates ideas and practices which lie at the foundation of classical riding. *Healing Horses the Classical Way* will be of great value to those involved in remedial training. It also highlights the dangers inherent in quick fixes and provides valuable guidance for all who wish to train their horses along correct, progressive lines.
